

RECONS AGGREGATES

RECONSTM
STRENGTH MEETS SPEED

In high-pressure infrastructure projects where timely completion and strict quality standards are non-negotiable, Recons ensures that only the finest raw materials are used to create concrete that can withstand the harshest conditions.

Trusted by engineers for large-scale civil and industrial applications, our aggregates form the foundation of reliable structures.

Advantages

- Sourced from high-quality quarries ensuring durability and strength
- Perfect gradation for consistent mix and performance
- Assured quantity & timely supply for uninterrupted project flow
- Consistent quality control standards across all batches

Applications

Used as a base material for all concrete applications: Foundations, Roads & highways, Railroads, Landfills Transformer yards Storm drains & culverts Bridges & driveways.

Available in VSI (Vertical Shaft Impactor) grade:

- M – 10
- M – 20
- Crush Sand
- Wash Sand
- GS13
