FIBRE**

TM
RECONS
STRENGTH MEETS SPEED

Recons Fibre: When concrete demands more than just strength.
Ideal for roads, precast, industrial floors, tanks, and high-performance slabs.

Recons Fibre is

- Prone to shrinkage cracks
- Lacks tensile strength
- Becomes brittle under stress, temperature shifts, and corrosion

Why Recons Fibre?

- A high-performance secondary reinforcement additive
- Adds toughness, flexibility, and crack resistance
- Unique triangular cross-section ensures better bonding and mix stability

Benefits

- Reduces plastic & drying shrinkage cracks
- Prevents micro-crack propagation
- Enhances flexural and tensile strength
- Boosts abrasion & impact resistance
- Makes concrete more homogenous
- Cuts permeability, improving durability
- Extends structure lifespan
