

RECONS FLY ASH

**High Quality Processed Fly Ash for
Strong, Cost-Effective, and
Sustainable Construction**

Recons Fly Ash is a leading brand of high quality processed fly ash from the house of the Recons Group. Founded in 1987, Recons Group has over 35 years of experience in the building products and cement distribution market

Why Recons Fly Ash Is Best Modern-Day Construction Solutions?

- Reduced water-cement ratio which produces less shrinkages and less cracks
- Improved bonding of layers due to slow setting
- Better bond to steel and improved off-shutter finish
- Increased long term strength development
- Reduced cost
- Improved workability owing to the sphericity of fly ash
- Reduced danger of deterioration of Sulfates and Chlorides and thus greater durability
- Finer and more refined ore structure leading to less permeable and more beneficial reinforced concrete

RECONS FLY ASH

**Global Standard Quality for
Global Standard Construction**

- Recons Fly Ash confirms to the most stringent international standards
- Meeting high benchmarks with respect to durability, strength, and permeability
- Ball bearing effect of Recons Fly Ash particles create a lubricating action when concrete is in its plastic form
- Ideal cement replacement material in all types of concrete construction
- Meticulous quality checks during production and prior to dispatch
- Classified fly ash with pre-shipment quality and quantity certification by independent agencies
- Expert and experienced team to provide guidance in application

Major Applications of Recons Fly Ash

- Cement manufacturing
- All types of concrete construction
- Ready-mix concrete (RMC)
- Precast concrete products
- Bricks and AAC blocks
- Soil stabilization
- Plaster & masonry works
- Land fill
