

RECONS TILE ADHESIVE

Recons Tile Adhesive range is cement-based polymer modified mortar, which is a blend of Polymer Additives & Superfine quality of Silica Sand with cement. It is formulated to perform excellent BOND between Ceramic Tile/Marble/Stone, both for internal & external applications, with surprisingly low thickness of just 3 to 4 mm, making it a long lasting, cost-effective bonding adhesion.

As per IS 15477:2019

Benefits of Recons Tile Adhesive Range

- Single component, ready-to-use tile adhesive
- Excellently high workability
- Cost effective with zero wastage
- Easy application, requires only the addition of water on site
- Simple and speedy tile-fixing process
